

Fundamentals of Maritime Electronic Apparatus

Contents

Introduction	002
Chapter 1 Passive Element	
1.1 Resistor	010
1.2 Capacitor	014
1.3 Inductor	020
1.4 Transformer	024
Chapter 2 Semiconductors	
2.1 What is a semiconductor?	029
2.2 Diode	034
2.3 Transistor	037
2.4 Thyristor	039
2.5 IGBT	043
2.6 MOSFET	044
Chapter 3 Sequence Control	
3.1 Objective of Sequence Control	047
3.2 Switch, Relay and Contactor	049
3.3 Sensor switch	056
3.4 Others	059
3.5 How to Read Sequence Circuit	065

Chapter **4** Electric Power Conversion Circuit

4.1 Series Regulator	076
4.2 DC to DC Converter	078
4.3 AC to DC Converter	080
4.4 Inverter (DC to AC)	084
4.5 Applications of power conversion circuit	086
4.6 Things to be kept in mind	088

Chapter **5** Sensors and Signal Transfer

5.1 Measurement of Voltage and Current	095
5.2 Temperature Measurement	097
5.3 Pressure Sensor	101
5.4 Oxygen Analyzer	102
5.5 Level Meter	103
5.6 Optical Sensor	105
5.7 Tachometer (Revolution Counter)	106
5.8 Torque Meter	107
5.9 Flow Meter	108
5.10 Viscometer (Viscosity Meter)	108
5.11 Transducer	109
5.12 A/D Conversion, D/A Conversion	110

Annex

1 Tester	112
2 Insulating-Resistance Tester (Megger)	116
3 Clamp Meter	117
4 How to Denote and Read Sequence Control equipment	118
5 Control Appliance Numbers	120
