Chapter

Outline of Bilge Water Treatment

1 Bilge water treatment system008

1-1 Bilge water sources010

1-2 Engine room bilge systems012

1-2-1 Major bilge water treatment systems012

① Oily bilge water treatment system013

② Oily drain and sludge treatment systems013

③ Clean drain treatment system013

1-2-2 Oily bilge water treatment system013

① Bilge well → Bilge pump → Bilge tank014

② Bilge well → Bilge pump

→ Bilge primary tank → Bilge tank/Waste oil tank015

③ Bilge tank → Bilge separator pump

→ Bilge separator → Overboard or Bilge tank016

1-2-3 Oily drain and oil sludge treatment systems020

1-2-4 Bilge line automation system023

1-2-5 Emergency bilge line023

1-2-6 Independent bilge line024

Inboard Treatment of Bilge Water and Waste Oil

CONTENTS

1-3	Other types of inboard bilge treatment	025
1-3-1	Cargo hold bilge	025
1-3-2	Diesel ship exhaust gas economizer washing water drain	026
1-3-3	Diesel ship clean drain tank for recovery/discharge of drain	027
1-3-4	Turbine ship clean drain	028
1-3-5	Main engine air cooler clean drain	028
1-4	Integrated Bilge Treatment System (IBTS)	030
1-4-1	Guidelines for IBTS	030
1-4-2	IBTS Concept	030
1-4-3	Definitions of guidelines mentioned in the MEPC Annex	031
1-4-4	Outline of IBTS	031
1-4-5	Additional IBTS facilities	032
1-4-6	Example of IBTS	034

2 Bilge water treatment equipment036

2-1	Characteristics of bilge water	036
2-2	Bilge primary tank system	037
2-3	Bilge separator	038
2-3-1	Gravity separation-type bilge separator (Taiko Kikai Industries Co., Ltd.)	038
2-3-2	Bilge separator with emulsified oil handing function (Heishin Kikai Kogyo Co., Ltd.)	047
2-3-3	Bilge separator oil content monitor	055
2-4	Bilge pump, bilge separator pump	061
2-4-1	Bilge pump performance capabilities (Heishin Kikai Kogyo Co., Ltd.)	061
2-4-2	Piston pump	061
2-4-3	Uniaxial screw pump	062
2-4-4	Maintenance of bilge pump and bilge separator pump	063
2-4-5	Jet pump (Clean drain eductor)	063
2-5	Other bilge water treatment equipment	064
2-5-1	Bilge water treatment by means of ultrafiltration membrane (membrane filter)	064
2-5-2	AsahiKASEI FS oil/water separation filter	064
2-5-3	Microbubble treatment	065
2-5-4	Other (Biological treatment of bilge water in machinery space) Mitsubishi Heavy Industries Ltd.	066

2

Chapter

Outline of Waste Oil Treatment

1 Waste oil treatment systems068

1-1 Common types of waste oil treatment system068

1-1-1 Typical flow diagram068

1-1-2 Operation of uniaxial screw pump070

1-1-3 Waste oil settling tank

(Mist gas box, exhaust fan)071

1-2 Integrated Bilge Treatment System (IBTS)072

2 Waste oil incinerators073

2-1 SUNFLAME Co., Ltd. (Incinerator)073

2-1-1 Functions of incinerator073

2-1-2 Waste oil incinerator flow chart074

2-1-3 Waste oil incinerator structure075

2-1-4 Basic IMO requirements regarding waste oil incinerators077

2-2 VOLCANO Co., Ltd. (Incinerator)079

2-3 MIURA Co., Ltd. (Incinerator)082

2-4 TEAMTEC Marine Products Company (Incinerator)084

3

Chapter

Related Laws and Regulations

1 IMO MARPOL Convention 73/78088

2 Oil record book089

3 New IMO Convention MEPC76(40)090

Note: In relation to 1-3 above (inboard bilge treatment), restrictions on outboard bilge treatment methods are being deliberated. We need to pay attention to future developments in this respect.
